

COMPANY PROFILE

We engineer businesses, not just software.

Business. Finance. Tech.

Enterprise AI implementation and software engineering for organisations across Singapore and Southeast Asia. Strategy to production in 90 days.

SINGAPORE | INDONESIA | 20+ YEARS

WHO WE ARE

A Singapore software house that ships.

StarTech Innovation is a Singapore-based custom software house. We design and build production systems — enterprise AI, ERP, financial platforms and healthcare software — for organisations that have outgrown off-the-shelf tools.

We are implementers, not advisors. Every engagement ends in running software that your people use, not a slide deck. Our work is delivered by a specialist team and a vetted partner network, led directly by our Managing Director on every project.

We work natively across Singapore and Indonesia — Employment Act, PDPA, MAS, GST, CPF and IRAS on one side; BPJS and OJK on the other — and deliver in English, Chinese, Malay and Bahasa Indonesia.

MARKETS & COMPLIANCE

Singapore

Employment Act · PDPA · MAS · GST · CPF · IRAS · IMDA

Indonesia

BPJS · OJK · cross-border data residency

Wider SEA

Malaysia and regional deployments on request

WHAT SETS US APART

Implementation, not just strategy

We write the code, run the deployment and train your team. Delivery is the product.

90 days to production

A proven five-phase method that reaches a live system in a quarter, not a financial year.

Regulated-market fluency

Singapore and Indonesian compliance is built into the architecture from day one — never bolted on.

Grant handling included

For Singapore SMEs we run the full PSG and SFEC application process at no extra charge.

WHAT WE DO

Four practices, one delivery team.

AI Implementation

Custom GPT-4 and Claude implementations, RAG systems over your proprietary data, and intelligent automation pipelines.

- Retrieval-augmented generation with vector search
- Fine-tuned domain models with evaluation and versioning
- Guardrails for hallucination prevention and compliance
- Confidence scoring with source attribution

Enterprise Software

Full ERP and line-of-business systems — financials, HR, inventory, procurement and manufacturing.

- General ledger, AP, AR, payroll and fixed assets
- Multi-tenant, multi-currency, role-based access
- Audit-ready logging and compliance reporting
- Integrates with Xero, QuickBooks, Sheets and Excel

Financial Systems

Accounting engines, insurance document AI, startup valuation and fraud detection for regulated operators.

- DCF and comparable analysis with Monte Carlo simulation
- Automated reconciliation across accounts and currencies
- KYC and AML workflows, MAS and OJK reporting
- Real-time transaction monitoring and anomaly detection

Healthcare & Public Sector

Patient platforms, medical records and citizen services built for high-volume, high-assurance environments.

- Electronic medical records with HL7 and FHIR compliance
- AI-assisted triage by symptom severity
- BPJS claim integration for Indonesian providers
- High-availability infrastructure for critical services

ALSO AVAILABLE

Packaged AI solutions for smaller teams — deployable in days and eligible for Singapore government grants:

Receipt & Invoice Scanner

Customer Support Chatbot

Appointment Booking

Quotation Generator

Inventory Tracker

Document Translator

Employee Onboarding

Sales Assistant

Compliance Checker

Financial Report Builder

Training Content Generator

AI Avatar Studio

SELECTED WORK

Systems running in production.

AI performance co-pilot

PROFESSIONAL SERVICES, SINGAPORE

A personal AI co-pilot for SME knowledge workers, with four reasoning modes and peer-to-peer coordination across departments. Production API live on Cloudflare Workers with multi-LLM routing, speech-to-text and layered organisational context.

Multi-tenant ERP platform

ENTERPRISE, SINGAPORE & INDONESIA

A Java 21 / Spring Boot ERP backend with a Singapore payroll compliance engine. 51 REST controllers and 484 calculation classes, verified by 7,060 automated tests and a five-engine accounting harness that independently recomputes every statement.

Patient-owned health platform

HEALTHCARE, INDONESIA & SEA

A trilingual health platform operated from Singapore with Singapore-only data residency. Lifestyle tracking, insurance onboarding and an AI advisor are live, with a cross-border health vault and clinician portal in build.

Vehicle trading & logistics OS

CROSS-BORDER TRADE, JAPAN

A full operational rebuild for an international vehicle exporter — inventory, role-scoped CRM, document generation for proforma and commercial invoices, shipping instructions and two-level payment routing. Live in production.

HOW WE WORK

Strategy to production in 90 days.

WEEK 1-2	WEEK 3-4	WEEK 5-8	WEEK 9-11	WEEK 12+
Discovery & AI readiness	Solution architecture	Proof of concept	Production deployment	Optimisation & support
AI Opportunity Report & ROI projections	Technical architecture & implementation plan	Working PoC with core capabilities	Production system ready for users	Performance reports & recommendations

TECHNOLOGY

AI	CLOUD	BACKEND	FRONTEND
OpenAI GPT-4 · Anthropic Claude · ElevenLabs · HeyGen	Cloudflare Workers · AWS Bedrock, SageMaker, Lambda	TypeScript · Java Spring Boot · PostgreSQL · Redis	React · TanStack Start · Tailwind

NEXT STEP

Let's scope your first 90 days.

Tell us about the process that is costing you the most time or money. We will come back with an honest view of what AI and custom software can and cannot do for it — including a grant plan if you qualify.

WORKING LANGUAGES

English · 中文 (简/繁) · Bahasa Melayu · Bahasa Indonesia

Singapore SMEs may offset up to 50% of qualifying project costs through the Productivity Solutions Grant (PSG), with a further SGD 10,000 available via the SkillsFuture Enterprise Credit (SFEC). We prepare and submit the paperwork at no extra charge. Eligibility is confirmed against current IMDA and Enterprise Singapore criteria at the time of application.
